

Accessibility

We are committed to providing accessible and easy-to-use websites, mobile web and Apps ('platforms') for our customers. This is in line with our company's core value of using our collective intelligence to invent technology and create products that simplify and improve travel for our customers - whatever their abilities.

Our goal is to make our platforms accessible to the widest audience possible – including those with limited vision, hearing, mobility and/or cognitive functions.

We are currently working on our compliance with the forthcoming EU Accessibility Act (applicable from 28 June 2025) - and will update this page in due course.
